Professional Summary

Independent researcher developing G.O.A.L. and Urban OS 2040, exploring how urban environments can support human wellbeing and family life. Synthesizes evidence across housing, everyday services, demographics and technology into conceptual frameworks and research publications. Focuses on the relationships between these systems and their implications for human-centred masterplanning and urban development.

Professional Experience

Independent Researcher, G.O.A.L.

Oct 2024 — Present

- Founded and developed G.O.A.L., an independent R&D institute focused on Human Flourishing, Family Formation and Urban AI.
- Developed Urban OS 2040, a conceptual research programme connecting human wellbeing, family formation and urban AI to explore how these areas can inform urban development.
- Authored research papers and developed frameworks examining how housing, everyday services and neighbourhood conditions can support wellbeing and family life.
- Engaged international stakeholders across government, research, academia and industry to explore collaboration and knowledge exchange.

Consultant (Public Sector), Fagro, Maastricht

Dec 2024 — Jun 2026

- Coordinated municipal services supporting approximately 450 Ukrainian refugees.
- Worked across refugee finance, student transportation and social-support operations.
- Improved workflows and translated policy requirements into practical implementation.

Business Development Intern, CarterJMRN, Tokyo, Japan

Feb 2023 — Jul 2023

- Mapped and engaged Japanese and international organizations for partnership development.
- Coordinated communication between Japanese and international stakeholders.
- Helped develop and launch the Living Best Community multi-stakeholder programme.
